

# ANNUAL INDEX, Vol. 3 ◀ ◀ ◀

<b>A</b>	
Air pollution	
—Let's stick to facts (Comment), August	12
Aluminum Co. of America, Warrick County, Ind., September	29
Aluminum smelting has a voracious appetite (The Alcoa Story), September	29
American Mining Congress	
—66 Convention to feature a "new look at coal," March	36
—An interview with Al Overton at the AMC Coal Convention, July	38
Amherst Coal Co. #1 plant, Fanco, Logan County, W. Va., October	33
Auxiliary devices are important, too (Spotlight on Belt Conveyors), June	41
<b>B</b>	
Barnes & Tucker Co., Lancashire #15 Mine, Bakerton, Pa., December	38
Be careful, Buddy! (Comment), June	12
Be good to your conveyor belting (Spotlight on Belt Conveyors), June	38
Beatrice Pocahontas Co., Beatrice Mine, Oakwood, Va., August	47
Belt conveyor haulage moves ahead (Spotlight on Belt Conveyors), June	38
Bethlehem Mines Corp., Brookdale Mine #77, Cambria County, Pa., August	44
Bethlehem Mines Corp., Mine #31, Cambria Div., Nanty Glo, Cambria County, Pa., August	24
Bethlehem Mines Corp., Mine #32, Cambria Div., Revloc, Cambria County, Pa., October	42
Bethlehem Mines Steel Corp., Ellsworth Div., March	26
Bethlehem revamps fine coal cleaning sections, March	26
Big equipment accelerates Squaw Creek production (The Alcoa Story), September	30
Big hole drilling keys Rosebud production, June	26
Belch Mining Co., Bloomingdale, Ohio, November	26
Brookdale solves their sulfur problem, August	44
Brown, C. L.	
—Spotlight on methane monitoring: New devices subjugate evasive methane gas, November	20
Buckridge, Roger M.	
—High voltage application to underground equipment has many advantages, May	29
<b>C</b>	
Can coal live with subsidence laws? November	31
Captain of the coal industry, The, July	35
Central Appalachian Section of AIME, January	31
Clinchfield Coal Co., Smith Gap Mine, Dickenson County, Va., April	28
Coal Forecast '66, January	21
Coal Mining Institute of America 79th annual meeting, February	38
Coal must have low-cost waterway transport (Forecast '66), January	30
Coal prep meeting resembles the U. N., November	25
Coal Research forges ahead (Forecast '66), January	28
Comment	
—Be careful, Buddy! June	12
—European coal is having gas pains, December	7
—Gas explosions and the human element, March	3
—Go West, Young Man, Go West! April	8
—Is nuclear power a flash in the pan? November	8
—Is there no stopping TVA? February	4
—Let's stick to facts, August	12
—A new era in coal contract negotiations? July	6
—TVA replies, May	17
—We start on the Appalachia stripping mess, September	8
—We tip our hat to the Keystone Association, October	15
—What do you read, and why January	7
Cook, Harry N.	
—Coal must have low-cost waterway transport (Forecast '66), January	30
<b>Cunningham, Chet</b>	
—Eliminate the extra cost of winterizing: Do it now, October	39
<b>D</b>	
Dannenberg, Joe	
—A well-shot bank spurs good digging (Spotlight on Overburden Fragmentation), August	33
Day, Ray	
—Big hole drilling keys Rosebud production, June	26
Discover the easy way to build ventilation stoppings, September	39
Don't let water interrupt production (Spotlight on mine drainage), December	20
Duquesne Light Co., Warwick #3 Mine, Greene County, Pa., May	33
<b>E</b>	
Eadie, George R.	
—Brookdale solves their sulfur problem, August	44
—The Captain of the coal industry, July	35
—Learn America's secret for producing quality coal, October	33
—Longwall conquers bad roof at Bethlehem Mine, October	42
—Old mine takes modern approach to bad top, August	40
—Spotlight on ventilation: New trends in ventilating devices, September	22
—Sunbeam's ripper-doser tackles 34 ft of overburden, January	32
—Wanted: coal, July	26
—Western coal men predict: Coal will prevail via research & development, September	36
Eliminate the extra cost of winterizing: Do it now, October	39
European coal is having gas pains (Comment), December	8
<b>F</b>	
Firedamp drainage in British coal mines, Part 1, March	30
—Part 2, April	32
—Part 3, June	30
Forseen: Solution to coal-ash slag disposal, November	35
<b>G</b>	
Garvey, James R.	
—Where do we stand on air pollution research? (Forecast '66), January	26
Gas explosions and the human element (Comment), March	3
Go West, Young Man, Go West (Comment), April	8
<b>H</b>	
Hansen, V. D.	
—The unit train concept—a revolutionary idea, May	22
Hewes, H. B.	
—Penn State pioneers coal management workshops, March	34
High voltage application to underground equipment has many advantages, May	29
Highlights of NCA's 49th Convention, August	29
How Belch makes 1 million yd of overburden disappear each month, November	26
How good is your bolting program? (Spotlight on Roof Control), February	27
How well do you communicate? (Spotlight on Communications), July	19
Humphreys, K. K., & W. F. Lawrence	
—Forseen: Solution to coal-ash slag disposal, November	35
Hunt, J. W.	
—Warwick No. 3 features tractor-trailer & belt transportation, May	33
<b>I</b>	
IEEE	
—Conference topics focus on maintenance group needs, May	38
IMI meeting spans coal research to market development, February	36
Illinois Mining Institute	
February	36
December	36
<b>Improve your ventilation and save, September</b>	
Indiana Coal Mining Institute	
—Surface mining aids water problem, May	40
Interstate Mining Compact survives Airing line, February	32
Interview with Al Overton at the AMC Coal Convention, An, July	38
Is nuclear power a flash in the pan? (Comment), November	8
Is there no stopping TVA? (Comment), February	4
<b>J</b>	
Jones, Donald C.	
—Auxiliary devices are important too (Spotlight on Belt Conveyors), June	41
—Be careful, Buddy! (Comment), June	12
—Be good to your conveyor belting (Spotlight on Belt Conveyors), June	38
—Belt conveyor haulage moves ahead (Spotlight on Belt Conveyors), June	38
—Bethlehem revamps fine coal cleaning sections, March	26
—Big equipment accelerates Squaw Creek's production (The Alcoa Story), September	30
—Coal Forecast '66, January	21
—Don't let water interrupt production (Spotlight on mine drainage), December	20
—European coal is having gas pains, (Comment), December	8
—Gas explosions and the human element (Comment), March	3
—Go West, Young Man, Go West! (Comment), April	8
—How good is your bolting program? (Spotlight on Roof Control), February	27
—How well do you communicate? (Spotlight on communications), July	19
—An interview with Al Overton at the AMC Coal Convention, July	38
—Is nuclear power a flash in the pan? (Comment), November	8
—Is there no stopping TVA? (Comment), February	4
—Let's stick to facts (Comment), August	12
—A new era in coal contract negotiations? (Comment), July	6
—Newfield Mine retires the hoisting shaft, October	36
—Protect conveyors with controls (Spotlight on Belt Conveyors), June	44
—Revolutionary new shuttle car makes debut at Nanty Glo, August	24
—Smith Gap strengthens Clinchfield's metallurgical output, April	28
—Stable captive market: Key to preparation plant design (The Alcoa Story), September	33
—TVA replies (Comment), May	17
—Wake up to the reality of dust collection (Spotlight on Dust Collection), October	27
—We start on the Appalachia stripping mess (Comment), September	8
—We tip our hat to the Keystone Association (Comment), October	15
—What do you read, and why? (Comment), January	7
—Why use KMnO <sub>4</sub> on mine drainage? December	37
<b>K</b>	
Kawenski, Edward, & John Nagy	
—Improve your ventilation and save, September	28
Kentucky Mining Institute	
—Kentucky Mining Institute travels underground, December	34
<b>L</b>	
Lawrence, W. F., & K. K. Humphreys	
—Forseen: Solution to coal-ash slag disposal, November	35
Learn Amherst's secret for producing quality coal, October	33
Let's stick to facts (Comment), August	12
Levin, Paul	
—Pumping—a good way to dispose of coal plant refuse, July	31
Longwall conquers bad roof at Bethlehem Mine, October	42

# M

<b>Maintenance</b>	
—Eliminate the extra cost of winterizing: Do it now, October	39
<b>Maintenance group deliberates problems of industry growth, November</b>	41
<b>Meeting reports</b>	
—Coal prep meeting resembles the U. N., November	25
—Conference topics focus on maintenance group needs, May	38
—Council of State Governments, St. Louis, Mo., February	32
—Highlights of NCA's 49th Convention, August	29
—IMI meeting spans coal research to market development, February	36
—An interview with Al Overton at the AMC Coal Convention, July	38
—Kentucky Mining Institute travels underground, December	34
—Maintenance group deliberates problems of industry growth, November	41
—National Safety Congress & Exposition, October	41
—R/D topics highlight CMIA session, February	38
—Surface mining aids water problem, May	40
—\$3,000 in scholarships highlights IMI meeting, December	36
—U. S. to host 5th International Coal Preparation Congress, September	42
—Western coal men predict: Coal will prevail via research & development, September	36
—West Virginia Coal Mining Institute and Central Appalachian Section of AIME annual meeting, January	31
<b>Mining Electric-Mechanical Maintenance Association</b>	
—Conference topics focus on maintenance group needs, May	38
—Maintenance group deliberates problems of industry growth, November	41
<b>Moody, Joseph E.</b>	
—Stay alert—where Federal legislation is involved (Forecast '66), January	23

# N

<b>Nagy, John, &amp; Edward Kawenski</b>	
—Improve your ventilation and save, September	28
<b>Nation accepts electric heating, The (Forecast '66), January</b>	25
<b>National Coal Association</b>	
—Highlights of NCA's 49th Convention, August	29
<b>National Safety Congress</b>	
—National Safety Congress & Exposition, Chicago, January	41
<b>Navajo blasts a hole in fragmentation costs with modern rock mechanics, December</b>	28
<b>Navajo mine, Utah Construction &amp; Mining Co., Fruitland, N. M., December</b>	28
<b>New era in coal contract negotiations? A (Comment), July</b>	6
<b>New trends in ventilating devices (Spotlight on ventilation), September</b>	22
<b>Newfield Mine retires the hoisting shaft, October</b>	36
<b>Now it's possible to abolish costly stablehole cutting in longwall, November</b>	38

# O

<b>Old mine takes modern approach to bad top, August</b>	40
--	----

# P

<b>P-B-S Coals, Inc., Mercersburg, Pa., July</b>	26
<b>Penn State pioneers coal management workshops, March</b>	34
<b>Pisell, George L.</b>	
—Robena Mine researches roof bolt methods (Spotlight on Roof Control), February	23
<b>Preparation</b>	
—Bethlehem revamps fine coal cleaning sections, March	26
—Brookdale solves their sulfur problem, August	44
—Learn Amherst's secret for producing quality coal, October	38

<b>—Stable captive market: key to preparation plant design (The Alcoa Story), September</b>	33
<b>—Wanted: Coal, July</b>	26
<b>Production forecast (Forecast '66), January</b>	22
<b>Protect conveyors with controls (Spotlight on Belt Conveyors), June</b>	44
<b>Psychology, research, training keynote coal mining section, National Safety Congress &amp; Exposition, January</b>	41
<b>Pumping: a good way to dispose of coal plant refuse, July</b>	31
<b>Pundari, N.</b>	
—Navajo blasts a hole in fragmentation costs with modern rock mechanics, December	28

# R

<b>R/D topics highlight CMIA session, February</b>	38
<b>Republic Steel Co., Banning No. 4 Mine, West Newton, Westmoreland County, Pa., September</b>	39
<b>Republic Steel Corp., Newfield Mine, Verona, Allegheny County, Pa., October</b>	36
<b>Research</b>	
—Foreseen: Solution to coal-ash slag disposal, November	35
<b>Revolutionary new shuttle car makes debut at Nanty Glo, August</b>	24
<b>Robena Mine (U. S. Steel Corp.), Uniontown, Pa., (Spotlight on Roof Control), February</b>	23
<b>Robena Mine researches roof bolting methods (Spotlight on Roof Control), February</b>	23
<b>Rosebud Coal Sales Co., Subs., Peter Kiewit Sons Co., Hanna, Carbon County, Wyo., June</b>	26

# S

<b>Safety</b>	
—Be careful, Buddy! (Comment), June	12
<b>Shannahan, John H. K.</b>	
—The nation accepts electric heating (Forecast '66), January	25
<b>'66 Convention to feature a "new look at coal," April</b>	36
<b>Slope &amp; surface conveyors are different (Spotlight on Belt Conveyors), June</b>	46
<b>Smith Gap strengthens Clinchfield's metallurgical output, April</b>	28
<b>Southwestern Ill. Coal Corp., Captain Mine, Perry County, Ill., July</b>	35
<b>Speed &amp; versatility: key to new monorail success, October</b>	46
<b>Spotlight on belt conveyors, June</b>	38
—Auxiliary devices are important, too	41
—Be good to your conveyor	38
—Belt conveyor haulage moves ahead	38
—Protect conveyors with controls	44
—Slope & surface conveyors are different	46
<b>Spotlight on communications</b>	
—How well do you communicate? July	19
<b>Spotlight on dust collection</b>	
—Wake up to the reality of dust collection, October	27
<b>Spotlight on methane monitoring</b>	
—New devices subjugate evasive methane gas, November	20
<b>Spotlight on mine drainage</b>	
—Don't let water interrupt production, December	20
<b>Spotlight on overburden fragmentation</b>	
—A well-shot bank spurs good digging, August	38
<b>Spotlight on train loading</b>	
—The unit train concept—a revolutionary idea, May	22
<b>Spotlight on ventilation</b>	
—New trends in ventilating devices, September	22
<b>Squaw Creek Coal Co., Boonville, Warrick County, Ind., September</b>	30
<b>Stable captive market: key to preparation plant design (The Alcoa Story), September</b>	33
<b>Stay alert—where Federal legislation is involved (Forecast '66), January</b>	23
<b>Stearn, Enid W.</b>	
—Can coal live with subsidence laws? November	31
—Interstate Mining Compact survives fringing line, February	32

<b>Sunbeam Coal Corp., West Sunbury, Pa., January</b>	32
<b>Sunbeam's ripper-dozers tackle 34 ft of overburden, January</b>	32
<b>Surface mining</b>	
—Big equipment accelerates Squaw Creek's production, September	30
—Big hole drilling keys Rosebud production, June	26
—The Captain of the coal industry, July	35
—How Boich makes 1 million yd of overburden disappear each month, November	26
—Navajo blasts a hole in fragmentation costs with modern rock mechanics, December	28
—Sunbeam's ripper-dozers tackle 34 ft of overburden, January	32
—Surface mining aids water problem, May	40
—A well-shot bank spurs good digging (Spotlight on Overburden Fragmentation), August	38

# T

<b>TVA replies (Comment), May</b>	17
<b>They're using dry compressed air at Beatrice Pocahontas, August</b>	47
<b>\$3,000 in scholarships highlights IMI meeting, December</b>	36
<b>Transportation</b>	
—Speed & versatility: key to new monorail success, October	46

# U

<b>U. S. to host 5th International Coal Preparation Congress, September</b>	42
<b>Underground mining</b>	
—Firedamp drainage in British coal mines, Part 1, March	30
—Part 2, April	32
—Part 3, June	30
—High voltage application to underground equipment has many advantages, May	29
—Old mine takes modern approach to bad top, August	40
—Revolutionary new shuttle car makes debut at Nanty Glo, August	24
—Smith Gap strengthens Clinchfield's metallurgical output, April	28
—They're using dry compressed air at Beatrice Pocahontas, August	47
—Warwick No. 3 features tractor-trailer & belt transportation, May	33
